

BANNOCK COUNTY SOLID WASTE

1500 N. Fort Hall Mine Road
Pocatello, Idaho 83204
Ph. (208) 236-0607

Construction and Demolition Debris

Bannock County accepts construction and demolition debris (C&D) at the Fort Hall Mine Landfill and McCammon Landfill sites. C&D is inert material and can be disposed of at a much lower rate than municipal solid waste (MSW). It is up to the customer to meet our acceptance criteria, and loads are subject to random load inspections. In order for waste to be accepted as C&D it must meet these requirements:

1) C&D waste consists of:

- Construction/ Demolition debris
- Cured asphalt and concrete rubble
- Masonry rubble
- Uncontaminated soils, rock, gravel, or dirt fill
- Bulky wood wastes, stumps, branches, or limbs
- Scrap metals, fencing, wire, poles, or boards
- Dead animals (Pocatello only)
- Asbestos (Pocatello only)

2) Waste must contain no more than 10% organic materials, household waste, carpet, plastics.

3) Waste must not contain any hazardous waste.

4) Any load that is redirected will be subject to the appropriate MSW tipping fee.

Thank you for your cooperation. For additional information,

Please contact us at (208) 236-0607.
