

## BANNOCK COUNTY SOLID WASTE

1500 N. Fort Hall Mine Road

Pocatello, Idaho 83204

Ph. (208) 236-0607

### Drum Policy

Bannock County accepts drums at Fort Hall Mine landfill and McCammon Landfill. A drum is a cylindrical container, made of steel or plastics, used for shipping bulk materials. Drums are generally used in commercial and industrial applications for the transportation of hazardous waste, therefore in order for Bannock County to accept drums they must meet these requirements:

- 1) Drums must be emptied, rinsed, and residue free.
- 2) The rinsed drums must then have lids off and/or holes punctured in both ends.
- 3) All Drums brought to Bannock County will be inspected for hazardous waste.

Thank you for your cooperation. For additional information,  
Please contact us at (208) 236-0607.
